### **Change in Design**

In my previous assignment 4- I realized that I was not thinking about the price on the product description page. I decided that it would be smart to show the users how much the muffins are no matter how cheap they can be. Additionally, I added an indicator to show how many items are in the cart so that user's are aware of the "place in cart" action that they are pursuing. Inside the cart, I decided to add the description of the muffin so that the audience is able to see what muffin it is rather than just having a small picture on it. Additionally, I also added a description to the muffin box so that they wouldn't have to go back and read the description to decide if they want the muffin or not.
